QUALITY AND ENVIRONMENTAL POLICY

DESTACO strives, becoming the leading provider of manufacturing solutions through continuous improvements in the following areas:

- Environmental and occupational safety health
- Quality performance
- On-time delivery
- Value-creating activities

Our vision:

- To be the world leader in the industrial automation, expert in the art and science of engineering for precise movement, placement, and control solutions to increase productivity and availability for manufacturers all over the world.

Our mission:

- We work together with our customers all over the world to develop innovative automation, clamping and containment solutions, to improve the productivity through a consistent focus on quality, passion for service and uncompromising commitment for our employees, environmental and ethical business practices.

Our principles:

- In addition to security, quality is the highest priority in our global Organization both internally and externally.
- We strive for excellence in quality, taking into account the environmental aspects in the design, manufacture and delivery of our products and solutions, as well as in all our services.
- We work closely with and for our customers to gather and to understand their needs, requirements and values. We support our customers in achieving their objectives with excellent innovative products, solutions and services at the highest level.
- We meet and exceed the security provisions, legal regulations and technical rules for the optimum benefit of our business partners and employees.
- We are committed to the achievement of established performance objectives and continuous improvement of all our processes including energy efficiency and the energy-related services.
